## Hinges

## Technopolymer certified self-extinguish

## MATERIAL

Glass-fibre reinforced polyamide based (PA) technopolymer, certified self-extinguishing UL-94 VO, black colour, matte finish.

## ROTATING PIN

AISI 303 stainless steel.

## STANDARD EXECUTION

Pass-through holes for countersunk head screws.

## FEATURES AND APPLICATIONS

The CFM-AE-VO hinge can be used in all areas for which specific regulations require the use of materials capable of preventing the risk of fire.

## ROTATION ANGLE (APPROXIMATE VALUE)

Max $270^{\circ}\left(-90^{\circ}\right.$ and $+180^{\circ}$ being $0^{\circ}$ the condition where the two interconnected surfaces are on the same plane).
Do not exceed the rotation angle limit so as not to prejudice the hinge mechanical performance.
To choose the convenient type and the right number of hinges for your application, see the Guidelines.

The max static load is the value beyond which the material may break thus prejudicing the hinge performance. Obviuosly, a suitable coefficient must be applied to this value, according to the importance and the safety level of the specific application.
