

Stainless Steel-Locking pins

Plastic knob, with axial lock (Pawl)

SPECIFICATION

Knob / Push button / Slide

- Plastic
- temperature resistant up to 80 °C
- Knob: black-grey
- Push button: red

Pin

Stainless Steel AISI 303

Pawl

Stainless Steel AISI 304 (sheet metal)

Spring

Stainless Steel AISI 301

INFORMATION

Stainless Steel-Pins with axial lock GN 114.3 are used for quick fixing, connecting and locking of various jig and fixture systems. A typical application is location pins which have to be often removed and replaced again.

The rectangular pawls made of Stainless Steel sheet metal keep the locking pin in an axial position in the bore. It can be retracted by pressing the button, once released it returns the pressure spring into its locking position.

The load values given in the above table at shear stress are theoretically obtained and indicative only. They are non-binding recommended values and rule out any liability. They constitute no general warranty of quality and condition. The user must determine from case to case whether a product is suitable for the intended use.

- Range of lock pins (see page 868)

ACCESSORY

- Ball chains GN 111 (see page 904)
- Stainless Steel-Ball chains GN 111.5 (see page 905)
- Retaining cables GN 111.2 (see page 906)
- Spiral retaining cables GN 111.4 (see page 908)

TECHNICAL INFORMATION

- Stainless Steel characteristics (see page A26)
- Plastic characteristics (see page A2)

Bore for key ring (ball chain)
